What is METATRONICS?

METATRONICS is an AI-powered crypto trading product that gives ordinary users access to systematic trading strategies through Telegram and Web — via a simple, deposit-based model.

It is built for people who want passive exposure to algorithmic trading without managing trades themselves — and for network builders who want an active income path through referrals and team growth.

Who is it **for**?

Passive Participants

Want to deposit funds and earn from AI-driven trading activity.

Active Partners

Want to build teams and earn from referrals and performance bonuses.

Priced-Out Investors

Shut out of hedge funds or quant products, still want automated strategies.

Crypto Users

Want a simple model — no lock-ups, no complexity, no gamified mechanics.

How it works.

A multi-layer system ingesting live exchange data, processed through AI models — following the institutional logic of machine learning, portfolio construction and execution quality.
